SEMINARIO

“Evolving challenges in diagnosis, risk stratification, and lifetime management of patients with clinically significant aortic stenosis”

Pasquale Paolisso, MD, PhD DIPARTIMENTO DI MEDICINA CLINICA E
MOLECOLARE

Abstract: This seminar will address the evolving challenges in the diagnosis, risk stratification, and lifetime management of patients with clinically significant aortic stenosis, integrating insights from multimodality imaging, invasive hemodynamics assessment, and translational research. It will be highlighted how novel markers of cardiac damage, coronary microvascular dysfunction, and emerging pharmacological strategies may refine clinical decision-making and improve long-term outcomes.

Lunedì 22 Dicembre 2025 ore 14.00
